

VILLAGE OF ALSIP

12221 S. ORCHARD AVENUE, ALSIP IL 60803

708-385-6902 x364

Inspection/trimming/removal

The Forestry Division receives a high volume of requests for inspection of parkway trees. Once a request is logged, a Public Works forester will inspect the parkway tree(s) and notify/schedule the next steps that should be taken to care for the tree.

Trimming and removal actions will be performed only by the Village or Village contractor for parkway trees. The Village trims the parkway trees on a request basis.

If a parkway tree dies, the Village will remove it, grind out the stump and place soil and seed.

Currently the Forestry Division has a high volume of calls and most work is about 12-14 months out. We appreciate your patience for this service.

Please contact the Alsip Public Works Department for questions or additional information at (708) 385-6902 ext 364 during regular business hours 8am-4:30pm.
