Hopeful Tomorrows Start with the Early Childhood CONFERENCE

Saturday, March 28 • 7:30 a.m.–1:15 p.m.

Unlocking the Puzzle of Autism

Individuals with autism are not able to understand the intricacies of the people or world around them nor can they fully explain themselves to the rest of the world. Individuals without autism also have difficulty understanding those who are in the spectrum. This is why the symbol most commonly associated with autism spectrum disorders is the puzzle piece. This course serves as an introduction to autism to assist parents, educators and child care providers in better understanding the issues associated with the disorder to better assist the children in their lives that are *in the spectrum*.

8 to 10:30 a.m. Presenter: *Brendan McCormick*

Course Code: CN4-422-270

Understanding Behavior: Basic Principles of Applied Behavior Analysis

Applied behavior analysis (ABA) is a scientific approach to understanding behavior. It gives us insight into the intricacies of human behavior and helps us understand why behavior occurs. This course serves as an introduction to ABA to help parents, educators and child care providers better understand the why children behave the way they do and how to increase appropriate behaviors.

10:45 a.m. to 1:15 p.m. Presenters: *Brigid McCormick, M.A., BCBA, and Douglas Bronwen, M.A., BCBA*

Pre-registration required.
\$50 a person. No walk-ins.
Continental breakfast provided.
